CONCIERGE / GUARD STATION

PUBLIC VISITOR STATION
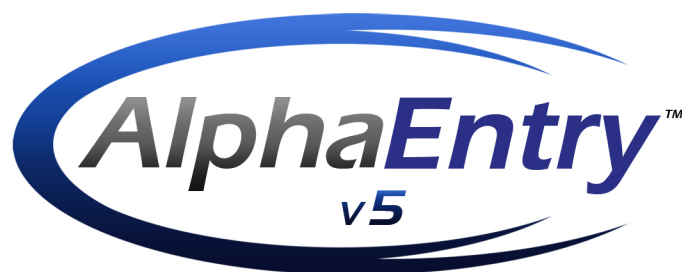

AlphaEntry™
v5

THE MOST POWERFUL BUILDING ENTRY & EMERGENCY CALL SOLUTION AVAILABLE

THE WELCOME AND DIRECTORY SCREENS

The AlphaEntry™ Welcome Screen has a slideshow that can be customized with your own images for advertising, holidays or to show off your building. The address can be displayed along with the time, date and weather*. The caller can tap the screen to view the directory or choose from a variety of languages that the text and voice prompts will be presented in. The directory is extremely easy to use. Once the directory is visible, the caller can easily search for the resident they are looking for by Name or Suite number and tap the selection to initiate a call. The on-screen keypad can also be used as an access control panel to allow entry into the building.

COMBINE 8 DIFFERENT CALLING METHODS

Telephone (Entry) • **Analog Intercom**

SIP • Mobile/Tablet Apps

VoIP • **Qwikbus™ 2-wire digital integration**

No Phone Bill/Service Telephone

Where Available

MANAGEMENT FEATURES

AlphaEntry™ gives management the ability to manage, maintain and monitor their buildings live and over their Local Area Network (LAN) or over the Internet*.

The Editor software allows changes to be made to any AlphaEntry™ station as well as any of the building resident settings.

The Log Viewer gives management the ability to monitor a photo-capable building-wide event log live, as things happen.
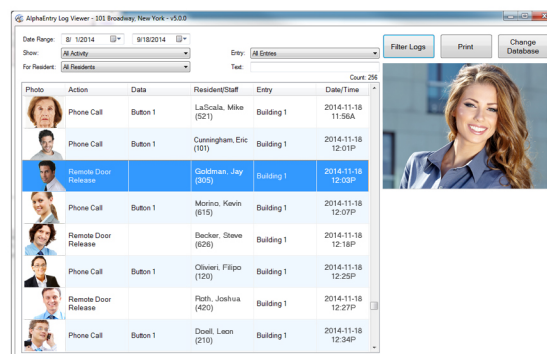

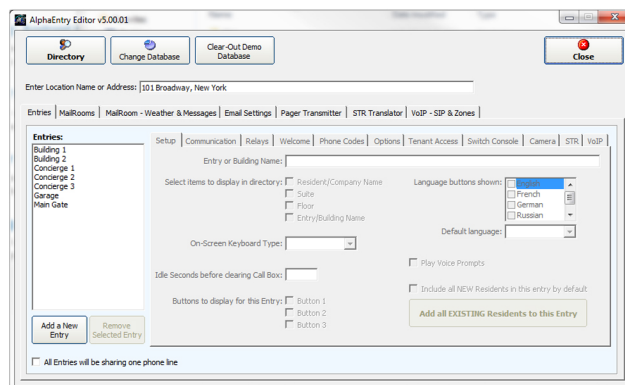

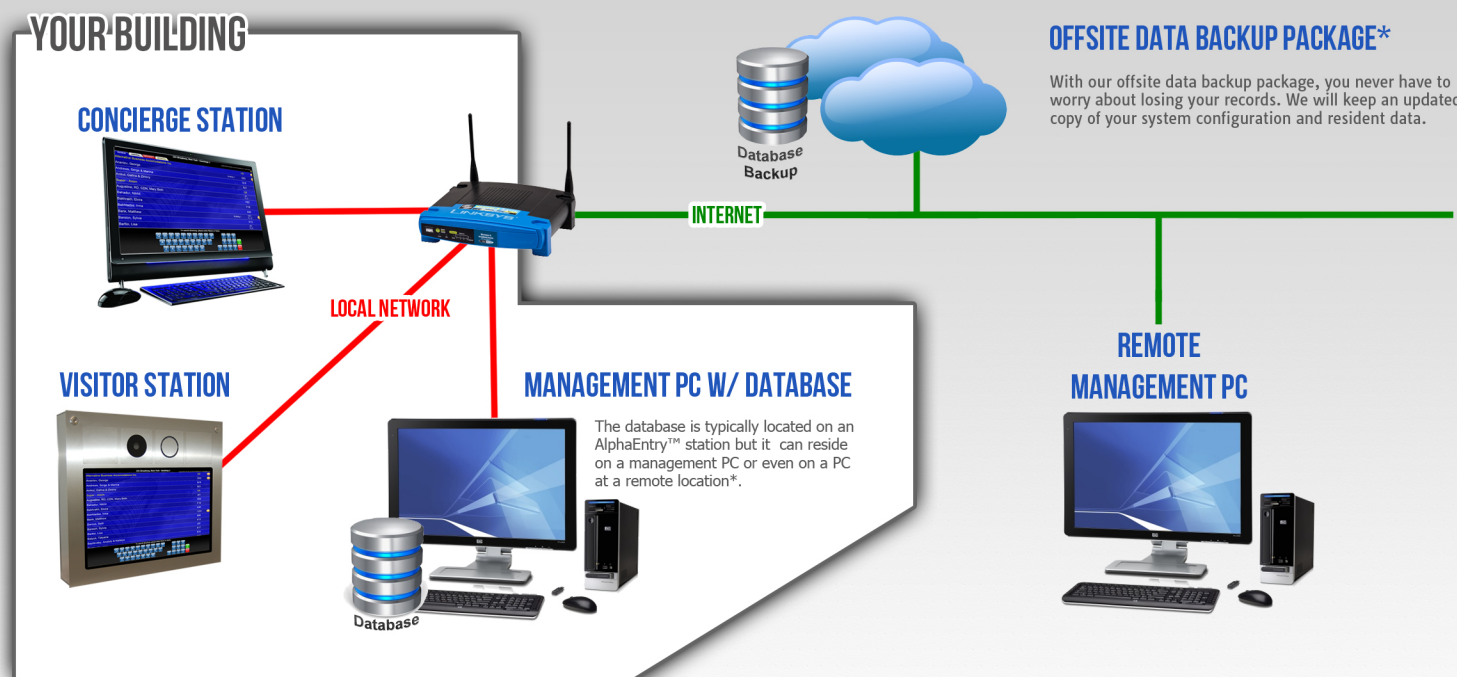

Editable over LAN or Internet*

AlphaEntry™ v5

PUBLIC / VISITOR

In Public/ Visitor Mode, AlphaEntry™ is a simple intuitive resident directory and lobby panel that can also be retro-fitted to many existing intercom systems. The intuitive design will assist your visitors in finding the location of their desired resident. The visitor can call up to the resident to gain access to the building. Building residents can gain access to the building using their access code.

Modern, Rugged Modular Design

Multilingual Text and Audio Voice Prompts

8 Call Methods • Resident Access Codes

Multiple Call Buttons Per Resident

Resident QwikFIND™ • Video Capable

Privacy and Priority Listings

CONCIERGE / GUARD

In Concierge Mode, AlphaEntry™ becomes an even more feature rich concierge / doorman / guard station. All of the standard features are present while many others can also be enabled. Allow your staff members to accept packages and perform other services for your residents.

Delivery Tracking/Display

QWIKBUS™ 2-WIRE DIGITAL INTERCOM AND VIDEO INTERCOM

QwikBUS™ open voice apartment stations can be surface mount, and protrude from the finished wall less than 1". You can choose from the standard FSE1500 Series Audio, HT40E Series Audio Handset or VFSE1500 Series Video stations. All models can have optional external dry contact input capability. You can even to mix and match them all on the same system. All open-voice models can be optionally flush mounted*.

EMERGENCY-CALL

When used with QwikBUS™ devices, you can make AlphaEntry™ a full-featured Emergency-Call system with 2-way voice communication and a variety of signaling devices to fit any application. This makes it ideal for Assisted Living and Independent Living facilities.

Pull Cords • Pendants • Push Stations
2 Call Priorities • Resident Medical Information
Call-Up & Call-Down w/ optional photo*
Pocket-Paging Capable • Voice Privacy Emergency Override
Alarm Text Notifications to E-Mail and/or Cell Phones
Call to Central Station**

OTHER FEATURES

AlphaEntry™ MailRoom™ Package Display*

You can tie one or more MailRoom™ displays into the system to provide residents a place to check to see if they received a package. These displays are customizable in color and icon format to fit your building's style and function requirements.

Integration With alphaBLUELIGHT™*

AlphaEntry™ can be integrated with **AlphaBlueLight™** Emergency Call Boxes and Call Towers in order to provide your security staff with **voice communication** and an optional **IP video** feed from the scene. Visit alphabluelight.com for more information.

Integration With ALPHANOTIFY™ *

AlphaEntry™ can be integrated with our AlphaNotify™ Mass SMS Notification platform in order to facilitate routine or emergency notifications to your building residents, staff and others. Visit alphanotify.com for more information.

Integration With Remote Doorman Services*

AlphaEntry™ can be integrated with most remote doorman services in order to provide seamless operation without the need for a second dedicated door station.

* Some features may require a full-time Internet connection, additional hardware or service subscription.

CENTRALIZED ACCESS CONTROL

AlphaEntry™ comes fully integrated with QwikAccess™*, our brand new access control platform*. Now you can Manage your resident directory as well as your resident access privilleges all in one place - and it can even be done over your Local Area Network or over the Internet. Access privileges are fully schedulable and customizable for each resident, giving you full control over your facilities.
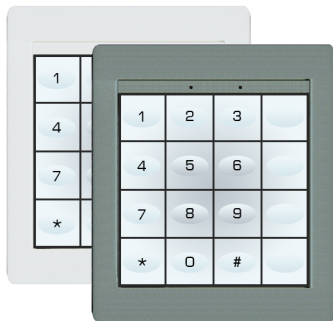

TYPICAL ALPHAENTRY™ APPLICATIONS

MULTI-UNIT RESIDENTIAL & COMMERCIAL BUILDINGS

AlphaEntry™ can act as a basic touch screen directory with QwikFIND™ name finder or a feature-rich building entrance panel with multiple calling methods, access control functions, live visitor video to resident mobile devices* and much more!

COLLEGES, HOSPITALS, AIRPORTS, PARKING GARAGES

AlphaEntry™ can act as Bluelight Emergency Call system. Large campuses and remote areas all need to have emergency call boxes in case someone should need help. AlphaEntry™ will notify the appropriate people right away and can even provide a live video feed to the master stations in addition to the call audio.

ASSISTED / INDEPENDENT LIVING, OUTPATIENT FACILITIES

AlphaEntry™ can act as an Emergency-Call system, alerting your staff to emergencies within the building. Staff members are immediately alerted through the AlphaEntry™ Masters, E-Mail or text message. Works with pullcords, push stations, wireless pendants and many other alarm-triggering devices with a dry contact output.
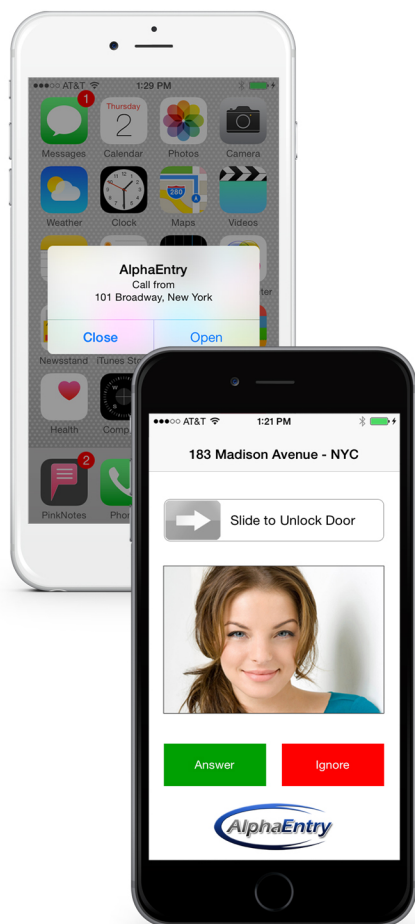

GATED COMMUNITIES

AlphaEntry™ can act as a guard booth attendant's central security console. The guard can view remote cameras, look up and call residents, see additional resident notes (like who can and cannot enter), take photos of a car's license plate and driver, and even open the gate on-screen!*

AlphaEntry™
v5

RESIDENT PACKAGE & MOBILE/TABLET APPS*

Live Visitor Video & IP Audio*

When subscribed to the Resident Package, residents can download our free app for their Android or iOS devices. This gives the residents the ability to answer calls from visitors from their couch, or from around the world. Answered calls can be handled with in-app audio and a live IP video stream of their caller. If access to the building is required, access also be granted with a simple swipe or touch.

*Available on all current iOS and Android Devices*

Online Web Portal*

Your building residents can log into their web portal in order to view their own visitor history, awaiting packages, and even update their contact phone number(s).

Text Notifications*

Building management and staff can easily send text-based messages from their AlphaEntry™ station to residents with the mobile app installed on their smart phone or tablet. Stop sliding flyers under your residents' doors and get your important information distributed quickly!
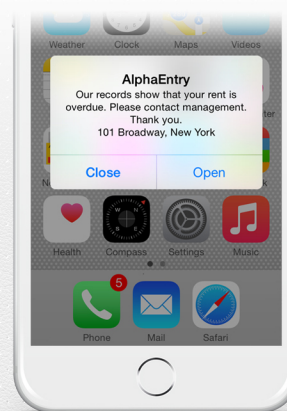

* Some features may require a full-time Internet connection, additional hardware or service subscription.
