

# **VESTA2 SE GB2 MONITOR**

# INTRODUCTION

First of all, we thank and congratulate you for purchasing this product.

Our commitment to achieving the satisfaction of customers like you is manifested through our ISO-9001 certification and the manufacture of products like the one you have just purchased.

Its advanced technology and strict quality control will ensure that customers and users enjoy the numerous features that this device offers. To get the most out of them and ensure proper operation from day one, we recommend that you read this instruction manual.

# SAFETY PRECAUTIONS

- Avoid overtightening the screws of the monitor's wall mounting connector.

- Always disconnect the power supply before installing or making modifications to the device.
- The fitting and handling of these devices must be carried out by authorised personnel.
- All of the wiring must run at least 40cm away from any other wiring.
- Install the monitor in a dry protected location free from the risk of dripping or splashing water.
- Do not place in humid, dusty or smoky locations, or near sources of heat.
- Before connecting the device to the mains, check the connections between the door panel, power supply, distributors and monitors.
- Always follow the instructions contained in this manual.

# CHARACTERISTICS

- Hands-free monitor.
- -4.3" TFT colour screen.
- Monitor with simple installation (non-polarised 2 wire BUS).
- The VESTA2 SE GB2/H monitor interacts with hearing aids equipped with T-mode, making conversation between apartment and door panel easier.
- Capacitive buttons to access and select menu functions:

#### User menu:

- Displaying door panel images.
- Displaying camera pictures (DQ-CAM-GB2 module required).
- Intercom calls between apartments.
- Calling the surveillance monitor.
- Intercom calls within the same apartment.
- Image memory (M-IP GB2 module required).
- Do not disturb mode (door panel and intercom calls are not received).
- Call divert (no function).
- Activating the outside light (SAR-GB2 module required).
- Settings: Ringtone, ring volume, auto switch-on time and language.
- About: Information, 'restore' default setting and access to installer menu.

#### Installer menu:

- Monitor as master or slave 1, slave 2 or slave 3. Up to 4 monitors per apartment.
- Surveillance monitor.
- Enabling the menu to be viewed when the Bus is busy.
- Activating intercom between apartments.
- Activating doctor mode (automatic door opening).
- Screen and volume settings menu: (during auto switch-on or communication).
- Contrast, brightness, colour and volume of the monitor speaker.
- Start/stop communication button and, in standby mode, it displays the image from the door panel.
- Door release 1 and 2 activation buttons / respectively.
- 'Doctor mode' function (automatic door opening).
- U Power status LED.
- 🖉 'Do not disturb' mode LED fixed/'Doctor mode' LED slow blink.
- Different ringtones to identify the origin of the call (door panel, intercom or apartment door).
- DIP switches for setting the monitor address (call code) and end of line.
- Input for call from the apartment door.
- SAR-12/24 call repeater output (12Vdc/50mA maximum).

# SYSTEM OPERATION

- To make a call, the visitor must press the button of the apartment; an audible sound indicates that the call is being made and LED will turn on. If vocal synthesis is enabled, a 'Call is in progress' message appears indicating that a call is being made. At this moment, the apartment's monitor receives the call. If another apartment is called by mistake, press the button for the correct apartment and the first call will be cancelled.
- The call lasts for 40 seconds and, when received, the image appears on the master monitor without the visitor knowing. To view the image on a slave monitor, this function needs to have been enabled on the monitor. <u>House kit application</u>: the image appears on the monitor (with code 0 'house 1' or monitor with code 16 if the call is in 'house 2') when receiving the call without the visitor being alerted.

If the call is not answered within 40 seconds, LED a will turn off and the channel will be freed.

- To establish communication, press button of the monitor and LED of the door panel will turn on. If the monitor is a Vesta2 SE GB2/H with icon on the front, make sure that the hearing aid is between 15 and 25 cm away from the monitor to ensure maximum audio quality during communication with the door panel.
- Communication will last for one and a half minutes or until button 💮 is pressed again. When communication has finished, LEDs 🚭 and 🕽 will turn off and the channel will be freed. If vocal synthesis is enabled, a 'Communication is finished' message will indicate that the call is over.
- To open door 1 or 2, press the corresponding button  $\bigcirc$  / $\bigcirc$  / $\bigcirc$  during the call or communication processes: one press will activate the lock release for five seconds and LED will also turn on for five seconds. If vocal synthesis is enabled, a 'Door open' message will be indicated on the door panel.
- A description of the function buttons can be found on page 4.

# **DESCRIPTION OF THE MONITOR**

- a. Microphone.
- **b.** Communication with hearing aids (Vesta2 SE GB2/H). Set the hearing aid switch to the T position, see page 8.
- c. 4.3" TFT colour screen.
- d. Open/close menu button.
- e. Menu buttons.
- f. Function button door 2 activation.
- In standby: 'Do not disturb' button/indicator and 'doctor mode' indicator.
- g. Marks for people with a visual disability.
- h. <u>Function button</u> start/stop communication. In standby: Display door panel image.

#### Menu buttons and status LEDs:

Menu access and function selection button.

\_\_ Menu scroll down button.

- In auto switch-on, call or communication: activates the outside light.
- Menu scroll up button.
- In auto switch-on, call or communication: selects from the door panel camera(s) in ascending mode and in carousel (if any).
- Menu back button.

# Connection terminals and DIP switch:

#### **Connection terminals:**

L1, L2: Bus connection (non-polarised).

HZ+, HZ-: Door bell connection.

SONERÍA, GND: Call repeater connection (SAR-12/24). (12Vdc/50mA maximum).

#### **Configuration DIP switch:**

**DIP 6:** Configures the end of line. Leave in the ON position in monitors where the bus cable terminates. Set to OFF in intermediate monitors only.

DIP 1 to DIP 5: To set the monitor address (addresses 0 to 31).

The switches set to OFF have a zero value.

The values of the switches set to ON are shown in the table below. The monitor code is the sum of the values of the switches set to ON.

#### Table of values

Switch number: 1		2	3	4	5
Value when ON:	1	2	4	8	16

Example: 0 + 0 + 4 + 0 + 16 = 20

#### **i. Function button** door 1 activation.

In standby: Press for 10 seconds to activate/deactivate the 'doctor mode' function (function code [9018] must be activated)

- j. Connector fixings
- k. Horizontal cable entry.
- I. Connector.
- m. DIP switch.
- n. Bus connection terminals.
  - Power <u>status LED</u>. <u>Button:</u> End call/communication. In standby: Enter/exit menu mode.
  - Do not disturb' function access button.
- LED on: 'do not disturb' mode activated. LED blinking: 'doctor mode' activated. LED off: function not activated.

# **DESCRIPTION OF THE MONITOR**

# Setting the monitor's address codes (addresses 0 to 31):

DIP 6: Configures the end of line. Leave in the ON position in monitors where the bus cable terminates. Set to OFF in intermediate monitors only.

DIP 1 to DIP 5: To set the monitor address (addresses 0 to 31).

# INSTALLING THE MONITOR IN A WALL MOUNTING CONNECTOR

Avoid dusty or smoky environments or locations near sources of heat.

#### Positioning the wall mounting connector:

The top of the connector must be positioned at a height of 1.60m. The minimum distance between the sides of the connector and the closest object must be 5cm.

#### Fixing the monitor's wall mounting connector to the wall:

Fix the monitor's wall mounting connector to the wall by drilling two 6mm diameter holes and using the screws and plugs supplied with the monitor.

#### Positioning the monitor:

Connect the cables to the monitor (see p. 4), position the monitor in front of the wall mounting connector, ensuring that the holes in the base of the monitor line up with those on the connector (1), and then move the monitor downwards (2) until the monitor is securely fixed to the connector (3).

#### Remember to remove the protective covering from the front of the monitor once installation is complete.

# INSTALLING THE MONITOR IN AN EMBEDDING BOX

Avoid dusty or smoky environments or locations near sources of heat.

#### Location of the embedding box:

Make a hole in the wall to position the top of the universal embedding box at a height of 1.60 m from the ground. The minimum distance between the sides of the embedding box and the closest object must be 5cm.

#### Positioning the embedding box and fitting the wall mounting connector:

Pass the cable through the hole made in the embedding box. Embed the box and ensure that it is level and flush. Fix the wall mounting connector of the monitor to the embedding box with the screws supplied.

#### Positioning the monitor:

Connect the cables to the monitor (see p. 4), position the monitor in front of the wall mounting connector, ensuring that the holes in the base of the monitor line up with those on the connector (1), and then move the monitor downwards (2) until the monitor is securely fixed to the connector (3).

#### Remember to remove the protective covering from the front of the monitor once installation is complete.

# **OPERATION**

Communication with hearing aid (Vesta2 SE GB2/H monitor only):

Make sure that the hearing aid is 15-25 cm away from the monitor to ensure maximum audio quality during communication with the door panel.

# 1.1 Receiving a call from the door panel:

When a call is received, the monitor(s) will play a melody and show the door panel image on the master monitor without alerting the visitor. If the call is not answered within 40 seconds the monitor returns to standby mode. If there is an M-IP GB2 memory module, it will automatically take a photo or record video (for video, a 16GB Class 10 MicroSD card is required, **not supplied**) and status LED (1) will blink indicating that a photo/video is pending viewing.

- To open door 1, press the door release button during the call: one press will activate the lock release for 5 seconds.
- ☑ To open door 2, press the door release button
   ☑ during the call: one press will activate the lock release for 5 seconds.

# **OPERATION**

Continued from previous page.

#### 1.2 Call not answered (missed call):

When a call is received, the monitor(s) will play a melody and show the door panel image on the master monitor without alerting the visitor. If the call is not answered within 40 seconds the monitor returns to standby mode. If there is an M-IP GB2 memory module, it will automatically take a photo or record video (for video, a 16GB Class 10 MicroSD card is required, **not supplied**) and status LED (<sup>1</sup>) will blink indicating that a photo/video is pending viewing.

#### 1.3 Ending a call from the door panel:

When a call is received, the monitor(s) will play a melody and show the door panel image on the master monitor without alerting the visitor. If there is an M-IP GB2 memory module, it will automatically take a photo or record video (for video, a 16GB Class 10 MicroSD card is required, **not supplied**) and status LED () will blink indicating that a photo/video is pending viewing. To end the call, press button ().

#### 1.4 Answering a call from the door panel:

To op durin relea

To open door 1, press the door release button during the call: one press will activate the lock release for 5 seconds.

- $\triangleleft$  To open door 2, press the door release
  - button during the call: one press will activate the lock release for 5 seconds.

When a call is received, the monitor(s) will play a melody and show the door panel image on the master monitor without alerting the visitor. If there is an M-IP GB2 memory module, it will automatically take a photo or record video (for video, a 16GB Class 10 MicroSD card is required, **not supplied**) and status LED (1) will blink indicating that a photo/video is pending viewing. To answer the call, press button . If the monitor is a Vesta2 SE GB2/H with icon 2 on the front, make sure that the hearing aid is between 15 and 25 cm away from the monitor to ensure maximum audio quality during communication with the door panel.

Communication will last for one and a half minutes or until button (---) is pressed again.

- ) Start/stop communication.
- To open door 1, press the door release button during communication or call processes: one press will activate the lock release for 5 seconds.
- To open door 2, press the door release button during communication or call processes: one press will activate the lock release for 5 seconds.

9

# **OPERATION**

Continued from previous page.

#### 1.5 Answering a call from the door panel (activating light SAR-GB2 and displaying cameras DQ-CAM-GB2):

When a call is received, the monitor(s) will play a melody and show the door panel image on the master monitor without alerting the visitor. If there is an M-IP GB2 memory module, it will automatically take a photo or record video (for video, a 16GB Class 10 MicroSD card is required, **not supplied**) and status LED (1) will blink indicating that a photo/video is pending viewing. To answer the call, press button (2). If the monitor is a Vesta2 SE GB2/H with icon (2) on the front, make sure that the hearing aid is between 15 and 25 cm away from the monitor to ensure maximum audio quality during communication with the door panel.

Communication will last for one and a half minutes or until button (-) is pressed again.

Start/stop communication.

To open door 1, press the door release button during communication or call processes: one press will activate the lock release for 5 seconds.

To open door 2, press the door release button during communication or call processes: one press will activate the lock release for 5 seconds.

- In auto switch-on, call or communication: activates the outside light (SAR-GB2 module required).
- In auto switch-on, call or communication: selects from the door panel the image of the camera(s) in ascending mode and in carousel (DQ-CAM-GB2 required). Note: Viewing the image of the door panel or camera(s) from the monitor enables the opening of door 1/2 and audio with the door panel in case of communication.

#### 1.6 'Doctor mode' function (automatic door opening):

#### **Description:**

The 'doctor mode' function enables lock release 1 to be activated automatically 7 seconds after making a call from the door panel without having to establish communication or press door release 1 button  $\bigcirc$ . The main monitor will display the door panel image without alerting the visitor. The call ends after 40 seconds and the channel is free. If there is an M-IP GB2 memory module, it will automatically take a photo or record video 6 seconds after receiving a call from the door panel (for video, a 16GB Class 10 MicroSD card is required, **not supplied**) and status LED  $(\bigcirc$  will blink indicating that a photo/video is pending viewing.

#### Enabling 'doctor mode':

To enable doctor mode, enter function code [9018] in the installer menu (see pp. 25-26).

#### Activating 'doctor mode':

To activate doctor mode, the monitor must be in standby mode. Then press button  $\bigcirc$  for 10 seconds. Status LED  $\swarrow$  will blink to indicate that the doctor mode function is activated.

#### **Deactivating 'doctor mode':**

To deactivate doctor mode, the monitor must be in standby mode. Then press button  $\bigcirc$  for 10 seconds. Status LED  $\trianglelefteq$  will turn off to indicate that the doctor mode function is deactivated.

#### Important:

When activating 'do not disturb' mode (with the monitor's 'doctor mode' activated), the status LED will change from blinking to fixed and the 'doctor mode' function will be cancelled.

When deactivating 'do not disturb' mode (with the monitor's 'doctor mode' activated), the status LED will blink and the 'doctor mode' function will be reactivated.

# MONITOR SCREEN AND VOLUME SETTINGS MENU

**To adjust the contrast**, the monitor must be in communication or auto switch-on mode. Then press button is to display the 'Contrast' option on screen. Using menu buttons ↑ and ↓, select the required contrast level. Press button to change the next option 'Brightness' or press ⊋ to exit the settings menu.

<u>To adjust brightness</u>, the monitor must be in communication or auto switch-on mode. Then press button repeatedly until option 'Brightness' is displayed on screen. Using menu buttons  $\uparrow$  and  $\downarrow$ , select the required brightness level. Press button to change the next option 'Colour' or press  $\bigcirc$  to exit the settings menu.

To adjust the colour, the monitor must be in communication or auto switch-on mode. Then press button ≡ repeatedly until option 'Colour' is displayed on screen. Using menu buttons ↑ and ↓, select the required colour level. Press button ≡ to change the next option 'Volume' or press ♀ to exit the settings menu.

#### Description of the menu buttons:

\* <u>Note:</u> The monitor takes a photo or makes an automatic video recording 6 seconds after receiving a call from the door panel.

<u>To access the menu</u>, the monitor must be in standby. Then press menu button to display the first options screen of the main menu.

Main menu
Camera/Door
Intercom function

1st menu screen

Image memory Do not disturb

Use menu buttons  $\uparrow$  and  $\downarrow$  to scroll through the different options and access the second screen of the main menu.

Continued from previous page.

#### <u>1. Displaying door panel/camera images:</u>

**<u>1.1 To display the image from one of the installed door panels</u>, use buttons \uparrow and \downarrow to go to option 'Camera/Door'** and press button == . The following selection screen will be displayed. Go to the option corresponding to door panel 'Door' whose image needs to be displayed.

Selection screen

The following screen will display the image from the selected door panel with address 1, it will also indicate the selected door panel 'DS-1' and the elapsed connection time.

The connection will last for 30 seconds or until option  $\checkmark$  is pressed.

So establish audio and video communication with the selected door panel, press button 🗢. The screen will display symbol 🌒. If the monitor is a Vesta2 SE GB2/H with icon 👰 on the front, make sure that the hearing aid is between 15 and 25 cm away from the monitor to ensure maximum audio quality during communication with the door panel. Communication will last for one and a half minutes or until button (-) is pressed again or option Q is pressed.

To open door 1 or 2, press the corresponding button / during the image display or communication processes: one press will activate the lock release for 5 seconds.

This symbol is only displayed in communication activated mode.

Continued from previous page.

**1.2 To display the image from one of the installed cameras (DQ-CAM-GB2 module required)**, use buttons ↑ and ↓ to go to option 'Camera/Door' and press button . The following selection screen will be displayed. Use buttons ↑ and ↓ to go to the option corresponding to camera 'Camera' whose image needs to be displayed.

Selection screen

The following screen will then display the picture from the camera selected with address 1, indicating the camera selected 'CM-1' and the connection time elapsed.

The connection will last for 30 seconds or until option  $\mathcal{D}$  is pressed.

Continued from previous page.

#### 2. Intercom function:

Use buttons  $\uparrow$  and  $\downarrow$  to go to option 'Intercom' and press button  $\equiv$ . The following selection screen will be displayed.

- **<u>2.1 To access the intercom calls between apartments function</u>, use buttons \uparrow and \downarrow to go to option 'Residents List' and press button \stackrel{\text{def}}{=} The following selection screen will be displayed. Use buttons \uparrow and \downarrow to select the apartment to call.**
- IMPORTANT: Activate function codes [9015] and [8017] on the monitor (see 'Installer menu' pp. 25-26).

Then press button to make the call. The following call screen will be displayed indicating the address of the apartment to call. A long audible tone will confirm that the call is being made or a series of short audible tones will indicate that the unit called is in communication with the door panel or on an intercom call with another apartment, and the call will not be made. If a call is being made, press option  $\mathcal{D}$  to cancel the call.

Continued from previous page.

In the called apartment, the monitor(s) will emit a melody indicating an intercom call and display the address of the apartment making the call. Press button  $\bigcirc$  to accept the call and establish communication or press option  $\bigcirc$  to cancel it. If the call is accepted, communication will last for one and a half minutes or until button (a) is pressed again or option  $\mathcal{P}$  is pressed.

Receive an intercom call

In communication

If during the intercom process a call is received from the door panel of another apartment, the intercom process will be cancelled; the monitor in the apartment will emit a melody to indicate that the call is being made and the image will appear on the master monitor. To establish communication with the door panel, press button (-) on the monitor. If there are slave monitors in the apartment, press button (-) on any of them.

The ringtones vary depending on where the call is being made from, enabling the user to identify its origin.

# Selection screen Select **Residents list** Dial Call guard unit Inner call

#### 2.2 To access the dial function (no function).

Continued from previous page.

2.3 To make a call to the building's surveillance monitor (if any), use buttons ↑ and ↓ to go to option 'Call Guard Unit' and press button 🗮 . The following call screen will be displayed indicating the address 'GU' of the surveillance monitor to be called. A long audible tone will confirm that the call is being made or a series of short audible tones will indicate that the surveillance monitor is in communication with another apartment, and the call will not be made. If a call is being made, press option ⊋ to cancel the call.

**IMPORTANT:** It is recommended to activate function code [8017] on the monitor (see 'installer menu' on pp. 25-26).

On the surveillance monitor, a melody will indicate the presence of a call and the address of the apartment making the call. Press button  $\bigcirc$  to accept the call and establish communication or press option  $\checkmark$  to cancel it. If the call is accepted, communication will last for one and a half minutes or until button  $\bigcirc$  is pressed again or option  $\checkmark$  is pressed.

If an apartment receives a call from the door panel while calling or communicating with the surveillance monitor, the call to or communication with the surveillance monitor will be cancelled. The apartment's monitor will emit a melody notifying the call from the door panel and the image will appear on the master monitor. To establish communication with the door panel, press button on the monitor. If there are slave monitors in the apartment, press button on any of them.

The ringtones vary depending on where the call is being made from, enabling the user to identify its origin.

Continued from previous page.

**<u>2.4 To access the intercom calls within an apartment function</u>, use buttons ↑ and ↓ to go to option 'Inner call' and press button made or short tones will indicate that a monitor in the apartment is already communicating with the door panel and the call will not be made. If a call is being made, press option ♀ to cancel the call.** 

**IMPORTANT:** It is recommended to activate function code [8017] on the monitor (see 'installer menu' on pp. 25-26).

A melody coming from the rest of the monitors in the apartment indicates an incoming intercom call. Press button  $\bigcirc$  to accept the call and establish communication or press option  $\bigcirc$  to cancel it. If the call is accepted, communication will last for one and a half minutes or until button  $\bigcirc$  is pressed again or option  $\bigcirc$  is pressed.

- If a call is received from the door panel during the intercom process, the intercom call will be cancelled; a melody on the apartment's monitor will warn that a call is being made and an image will appear on the master monitor. To establish communication with the door panel, press button on the monitor. If there are slave monitors in the apartment, press button on any of them.
- If during the intercom process a call is received from another apartment, the intercom process will be cancelled; the monitor in the apartment will emit a melody to indicate that the call is being made and the address of the apartment making the intercom call will be displayed (see 'Intercom between apartments' on p. 15).

The ringtones vary depending on where the call is being made from, enabling the user to identify its origin.

Continued from previous page.

#### 3. Image memory (M-IP-GB2 module required):

To view photos/videos of door panel calls, use buttons and to go to option 'Image memory' and press button The following selection screen will be displayed. Use buttons and to select the photo/video to view (for video, a 16GB Class 10 MicroSD card is required, not supplied, each video is 10 seconds long).

To delete the selected photo/video, press button E. The message 'Delete?' will be displayed on the screen. Press button to confirm the deletion and show the next saved photo/video or press option to cancel the deletion and return to the 1st menu screen.

Selection screen

#### Selection screen

To exit the 'Image memory' option and return to the 1st menu screen, press button Q.

<u>To change the time and date</u>, go to the 'Settings' option (as shown on p. 23) and then press button for 3 seconds. The following 'Date & Time' settings screen will be displayed. Press button to move over the date/time setting and use buttons  $\clubsuit$  and  $\checkmark$  to change the values. Press option to save and then press option to exit the user menu function.
