**PLEASE NOTE-** The above chart may be used to substitute an S.T.R. model HT2009/2 or HT3009/2 (2-WIRE) handset in place of the other 2-WIRE handsets shown.

The Siedle terminals shown are assuming that the diode and jumpers to make the Siedle handsets into a 2-wire handset are already in place.

Since all manufacturers constantly make changes to their equipment, this chart is intended solely as a guide, and we cannot guarantee compatibility will always be assured.
